

Charlie Black, Account Manager for EandM, has over 20 years of experience in training Fortune 500 companies that manufacture Automation Systems, Operator Control and Monitoring Systems along with Industrial Networking. He has worked as an Automation Technology Manager for Walter's Wholesale, RK Controls and County Wholesale Electric. He received his technology training in Digital Electronics from DeVry Institute of Technology in 1984. Charlie possesses a unique skill set to provide appropriate application solutions for automation products. His passion for training is unsurpassed as evidenced by the positive feedback from his students.

Description for class:

Join us for a 45 minute PLC Programming Hands On Lab where you will learn:

- How to create a project, not just a controller program
- Programming ladder logic while integrating your hardware configuration
- Connecting your Ethernet for programming with your operator interface
- And much more...
